SUMMARY

Third-year Bachelor of Software Engineering (Hons.) undergraduate at The Open University of Sri Lanka, with practical academic and project experience in application development, mobile application development, databases, networking, software testing, and data science.

Hands-on experience with Java, JavaScript, Python, C/C++, PHP, SQL, HTML, CSS, React Native, and Expo, together with development and testing tools including Git, GitHub, Postman, Android Studio, Cisco Packet Tracer, JMeter, Selenium IDE, and Google Colab.

Interested in applying software engineering knowledge in a professional environment, gaining practical industry experience, contributing to real-world projects, and developing technical and professional skills through a six-month industrial training placement.

EDUCATION

The Open University of Sri Lanka (OUSL)

Bachelor of Software Engineering (Hons.), Currently in 3rd Year, November 2023 – Present

Relevant areas of study:
Software Engineering, Object-Oriented Programming, Data Structures and Algorithms, Database Systems, Web and Mobile Application Development, Computer Networks, Operating Systems, Software Testing and Quality Assurance, Artificial Intelligence and Machine Learning, Data Science, System Analysis and Design

PROJECTS

CrewConnect — Filmmaking Collaboration Platform | Personal Project | In Development A mobile application concept designed to help filmmakers discover and collaborate with crew members and other resources required for film production. Technologies: React Native, Expo, JavaScript

- Designing a user-focused mobile application interface
- Developing application navigation and reusable UI components
- Planning user profiles and filmmaker/crew interactions
- Designing workflows around real-world filmmaking collaboration
- Exploring database, authentication, API, and backend integration

MiniMates — University Group Project | Frontend Developer | Completed Group Project Contributed as a frontend developer to a university group software development project.

- Developed and refined frontend user interfaces
- Implemented UI components and application screens
- Worked collaboratively with other team members

- Applied user-focused interface and design principles
- Participated in the development and refinement of the project

Wine Classification using KNN | Data Science Practical | Python Implemented a machine-learning classification model using the Wine dataset. Technologies: Python, Pandas, NumPy, Scikit-learn, Google Colab

- Dataset exploration and preprocessing
- Feature and target preparation
- Feature normalization
- Training/testing data split
- KNN model development
- Accuracy evaluation
- Confusion matrix and classification report

TECHNICAL SKILLS

Java
JavaScript
Python
C / C++
PHP
SQL
React Native
Expo
REST API integration
MySQL
Database design
Computer Networking fundamentals
Network topology design
Operating Systems fundamentals
Visual Studio Code
Android Studio
Technical Documentation
Team-Based Software Development
Problem Solving
Team Collaboration
Self-Learning
Communication
Creativity
Adaptability
Technical Research
Attention to Detail
Willingness to Learn

ADDITIONAL TECHNICAL EXPERIENCE

- Developed mobile application interfaces using React Native and Expo. - Worked with REST APIs and API testing using Postman. - Designed basic computer networks using Cisco Packet Tracer. - Developed C programs related to operating-system and virtual-memory concepts. - Performed software testing activities using Apache JMeter and Selenium IDE. - Worked with relational databases and SQL-based CRUD operations. - Conducted machine-learning experiments using Python and Scikit-learn. - Developed software projects both independently and as part of university teams.

LANGUAGES

English — Professional working proficiency
Tamil — Native / Fluent
Sinhala — Basic speaking; good understanding

AREAS OF INTEREST

- Application Software Development - Mobile Application Development - Frontend Development - Database Development - Networking & IT Infrastructure - Cloud Computing - Software Testing & Quality Assurance - User-Centered Software Design
